

Uniway Loaded Patch Panel

APPLICATION

Uniway 1RU 19-inch fiber optic patch panels have been designed to optimize both the internal fiber management and add greater fiber density, constructed from mild steel with a black powder-coated paint finish. The patch panels offer a flexible and highly versatile solution for optical splicing and patching. The panel's shallow depth allows it to be installed within the majority of standard racks and wall-mount enclosures. Raised slots in the panel base allow for customized fiber-management configurations and additional securing for incoming cables.

FEATURES

- Sliding tray for easy access complete with quick release fastenings
- Front panel includes a port identification strip
- Adjustable adapter position
- Light weight to reduce stress on rack mounting rails
- Suitable for mounting in shallow enclosures due to the adjustable mounting brackets allowing minimum depth of 237mm
- Slotted glanding holes for easy cable installation
- Rear panel offers a choice of apertures to suit a variety of glanding arrangements or if unsuitable customizable with the addition of adapter plates
- Additional adapter blanking plugs are available on request
- Suitable for both Blolite™ and conventional fiber cables
- Fiber adaptors include removable dust protection caps
